

THE
PERFECT HANDLE
SCREW DRIVER

MADE BY
The H. D. SMITH & COMPANY,
Makers of Drop-Forged Fine Tools
PLANTSVILLE, CONN., . . . U. S. A.

The PERFECT HANDLE Screw Driver

Patented.

VERY occasionally there is produced a tool of such transcendent merit, that upon its introduction it is frequently remarked:

"Why has this idea not been thought of before."

Wherever THE PERFECT HANDLE SCREW DRIVER has been shown this remark has invariably been among its welcomers, with such exclamations as:

Perfect!

Beautiful!

So Simple!

No Argument Necessary!

Can't Break or Twist that Handle!

All Its Value in Plain Sight!

A Model of Neatness and Convenience!

Etc! Etc! Etc!

No tool, we think, shows so much the clap-trap of misplaced ingenuity as the Screw Driver. Dissect any of the so called "best" up to the arrival of the PERFECT HANDLE, and their claim to quality will astonish you.

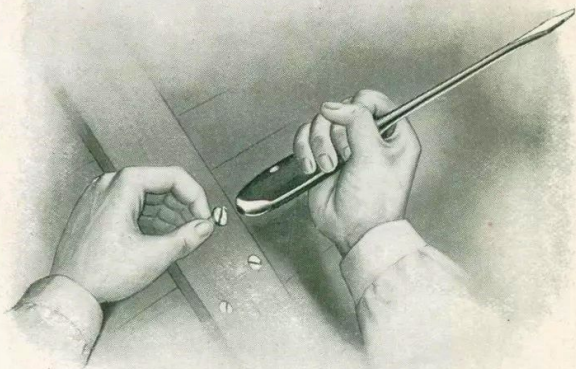

Per Contra, dissect the PERFECT HANDLE SCREW DRIVER and you will find one so absolutely simple and of such indisputable strength as to leave no doubt of its infinite superiority.

In tools, and matters mechanical and human, the stronger material should protect the weaker wherever and whenever possible. In Screw Drivers this is done on the PERFECT HANDLE and no other, the wooden handles being pocketed in each side of the drop forging in such a manner and so securely, that by test a handle split with a cold chisel had to be further split to splinters and pried out to remove it.

These handles are treated with our ***water-proofing process*** which renders them impervious to water, and they are finished in their natural color—a rich red—which with the ***water-proofing*** gives them a finish much preferred by mechanics over imitations of ebony, imitations of rose-wood and other apings of the real.

DROP-FORGED, ONE PIECE.

This illustration shows THE PERFECT HANDLE SCREW DRIVER being used as a HAMMER to force the point of a screw into wood.

They can also be used with a hammer to loosen rusty screws.

The HAMMER HEAD is an invaluable feature.

The **Blade, Bolster, Handle Flat** and **Hammer Head** are Drop-Forged of one piece of Steel made especially for the PERFECT HANDLE SCREW DRIVER. No tougher steel can be found and there is no better way to toughen it than by drop-forging.

In this respect, as in all others, THE PERFECT HANDLE SCREW DRIVER is in a class by itself and should not be confounded with Screw Drivers made of wire or stamped from sheet metal.

The **Oval Shaped Handle** gives greater leverage, fits the hand better and is more comfortable than fluted round handles and other shapes.

They are *well balanced*.

They are *tempered* very correctly, each one is carefully *tested*, and they are fully *warranted*.

HANDLES WATER-PROOFED.

THE PERFECT HANDLE SCREW DRIVER

From Hammer Head to Driver Tip A SOLID, ONE PIECE, DROP-FORGING

*Reputation is not Character.
Some Tools have Reputation, fewer have Character.
THE PERFECT HANDLE SCREW DRIVER
has both.*
